PROFESSIONAL SUMMARY

PMP-certified Technical Project Manager with 15+ years of experience in technical project management, leadership, and strategy, skilled in cloud transformation, SaaS integration, and cybersecurity. Proven track record of driving technical implementation and delivering results in fast-paced environments. Seeking to leverage my expertise in project management, technical leadership, and cybersecurity to drive success in a senior project management role.

CORE COMPETENCIES

- Technical Project Management
- Leadership
- Strategy
- Cloud Transformation
- SaaS Integration
- Cybersecurity
- API Integrations
- DevSecOps
- Project Planning

TECHNICAL SKILLS

Cloud & Infrastructure Platforms:

Azure Functions, Azure Networking, Azure Key Vault, Cloudflare Pages, Cloudflare Workers, Netlify, Vercel, Vercel AI SDK, VMware ESXi, Hyper-V

DevOps & Development Tools:

Git, GitHub, GitHub Actions, GitHub Copilot, CI/CD Pipeline Automation, Testing Frameworks, Deployment Validation, Rollback Procedures, Version Control, Branch Management, Code Review Workflows, Cursor, OpenAI Codex, Visual Studio Code

ERP & Financial Systems:

NetSuite, Vena, Ramp, Checkbook.io, SquareWorks

Productivity & Workflow Platforms:

Smartsheet, Asana, Microsoft 365 Suite, Box, Power Automate

Programming & Scripting Languages:

Python, JavaScript, TypeScript, React, SQL, VBScript, Batch, Bash, YAML

Payment Systems & Point-of-Sale:

Toshiba TCxSky/4690 POS Systems, Verifone & Ingenico Payment Terminals, First Data, WorldPay, Index Payment Processors, PCI-DSS Compliance, EMV Certification, eWIC Integration

PROFESSIONAL EXPERIENCE

Technical Project Manager — Vertex Education

October 2022 – Present

- Shaped the enterprise technology roadmap for a multi-entity K-12 education network, defining reusable integration patterns and scalable SaaS architecture to support over 150 subsidiary organizations.
- Developed multi-year technology enablement strategies to align Finance, Operations, IT, and Business technology with organizational goals, ensuring compliance with educational regulations.
- Drove the modernization of enterprise systems, led the transformation of financial workflows, and executed the technical integration of subordinate organizations during merger and acquisition activities.
- Evaluated, recommended, and implemented a portfolio of cloud-based, serverless, and automation solutions,

including Ramp, NetSuite, Asana, Box, SharePoint, Vena, and Azure.

- Maintained platform extensibility and integration governance, ensuring all development aligned with long-term scalability, maintainability, and architectural integrity.
- Led, planned, and delivered over 10 complex system automation, integration, and enhancement initiatives for NetSuite, Vena, Ramp, Smartsheet, Box, and related platforms, optimizing operations and aligning technical systems with business goals.

Technical Project Manager — Ravyx (formerly STCR)

February 2016 – March 2023

- Directed the enterprise POS and payment system architecture across 150+ retail locations, managing software/hardware platforms, payment terminals, and distributed retail infrastructure.
- Led strategic, nationwide multi-site deployments, implementations, and rollouts of PCI-compliant POS and electronic payment systems, ensuring operational security and regulatory compliance.
- Managed end-to-end POS deployments, including Toshiba TCxSky/4690 systems, Verifone and Ingenico terminals, and integrations with First Data, WorldPay, and Index payment processors.
- Directed the deployment, installation, and configuration of terminals across 100+ retail locations, coordinating logistics, network setup, site provisioning, QA, and on-site teams.
- Ensured PCI compliance, encryption key injection, and terminal health monitoring using administrative toolkits and remote device APIs.
- Implemented EMV-capable SDKs across terminal deployments, enabling secure encryption-at-entry and PCI-compliant payments.

Telecommunications Systems Manager — U.S. Army (Fort Drum)

July 2008 – December 2015

- Engineered, operated, and maintained critical, deployable network infrastructures supporting secure, high-capacity tactical and global communications under operationally demanding and combat conditions.
- Maintained and secured mission-critical communications networks, ensuring 100% mission uptime and operational continuity during deployment operations in high-risk environments.
- Led the configuration, deployment, and maintenance of Cisco routers, switches, encryption devices, and firewalls as part of the WIN-T infrastructure, supporting real-time, encrypted tactical communications.
- Operated and maintained complex telecommunications systems, including General Dynamics STT satellite terminals, HCLOS, Harris tactical radios, 15M/30M antenna systems, and Promina multiplexers.
- Supervised 24/7 Network Operations Center (NOC) functions, leading incident detection, escalation, fault recovery, bandwidth optimization, and rapid resolution across secure and unsecure channels to ensure operational continuity.
- Governed, managed, and maintained full property accountability for \$35M+ in high-value telecommunications and IT assets, executing full lifecycle asset planning, procurement, sustainment strategies, and logistics coordination.

EDUCATION

Master of Science (M.S.) in Organizational Leadership — Excelsior University (Expected July 2026)

Bachelor of Science (B.S.) in Information Technology — Excelsior University (July 2024)

Associate of Applied Science (A.A.S.) in Technical Studies in Computer Technologies — Excelsior College (January 2011)

CERTIFICATIONS

- Project Management Professional (PMP) — Project Management Institute (August 2025)
- CompTIA Network+ — CompTIA (May 2009)
